Zeng Natural Healing Special Offer for New Clients

Lily Hong Zhuang

Lily Hong Zhuang, owner of Zeng Natural Healing, welcomes the community to her new office in Nanuet. To celebrate, she is offering a 50 percent first visit discount for new patients.

According to Zhuang, there are Three Pillars of Chinese medicine. "One is acupuncture, another is Tui Na (medical massage), and the third is the use of herbs for healing," she explains. "These three methods are then highly

customized according to each individual's body type."

Zeng Natural Healing follows these principals to help people heal naturally. "Often each treatment includes an individualized combination of all of these therapies," says Zhuang. "Using these time tested ancient principals for self-healing has many advantages including drug free healing, relief of both physical and emotional symptoms, deep relaxation and greater energy."

Current patients have experienced great results with Zeng Natural Healing therapies. One patient writes: I have suffered from stuffy nose and sinus inflammation pain for many years. My regular doctor just gave me prescription medicines which did not help and had some side effects. After several acupuncture treatments with Zeng Natural Healing, my sinus symptoms are almost completely gone and with no side effects at all.

Zeng Natural Healing can help with smoking cessation, weight control, stress relief, aging related disorders, pain and numbness, anxiety, depression, migraines, sports injuries, fatigue and more. Zhuang provides personalized treatments utilizing Oriental medicine, acupuncture, acupressure, hot stone meridian, cupping and moxibustion therapies. "I use pain free needles or no needles if you prefer," adds Zhuang.

Zeng Natural Healing
